The Blue

LIVING, CRAFTED IN YOUR IMAGE

When you go through one day after another, feeling bound by constraints of your home that doesn't feel like one, there are two questions to ponder over.

"Did you ever live in true freedom?

Or were you merely a conduit of consolations?"

Manifest the destiny you aspire to have & bring home the true freedom of living.

THE CANVAS OF LIFE

CLASSICAL

THE ESSENTIAL & THE ECLECTIC

CONTEMPORARY

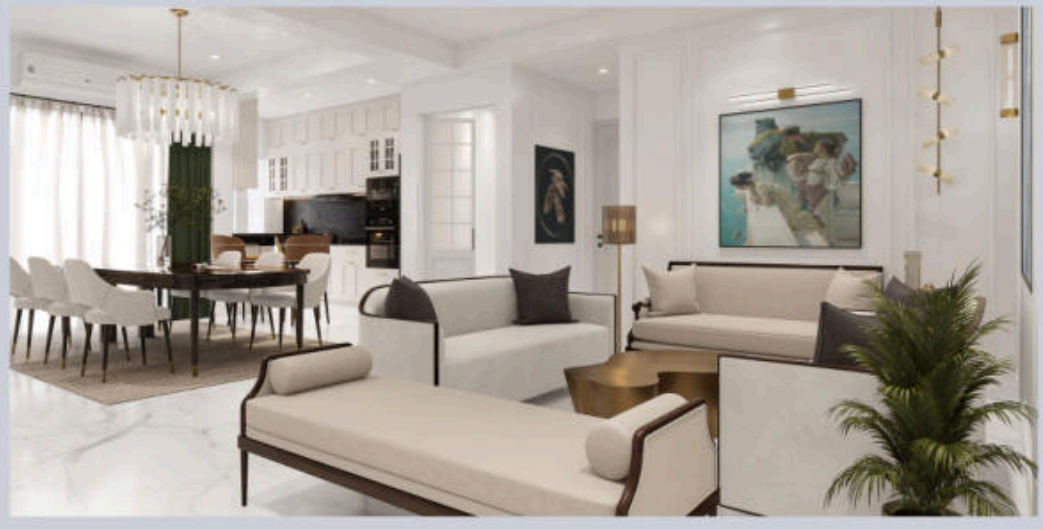

THE RETRO & THE ZEN

FUTURISTIC

THE SURREAL & THE CYBERSCAPE

STAND OUT YOUR OWN WAY

CLASSICAL

THE ESSENTIAL

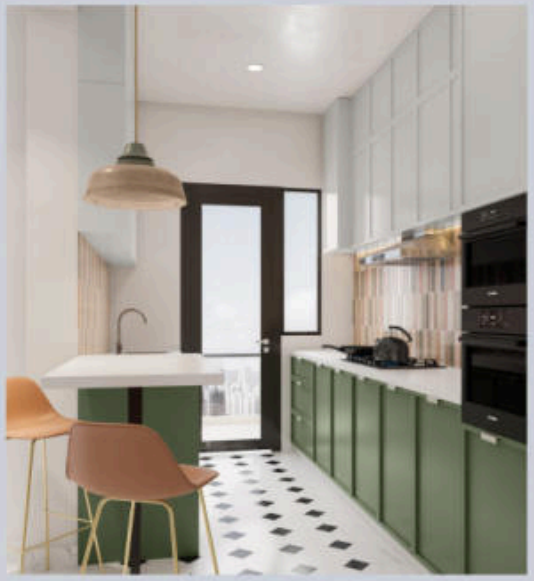

The Essential theme is inspired by the timeless elegance and sophistication of ancient Greece and Rome. With features such as ornate mouldings, bright intricately designed chandeliers, accents of dusted gold, and statement furniture pieces, this theme creates a sense of grandeur and poise.

The Essential is a bit of a subtle intervention of minimalism combined with the classical interior design style. Reduced to a few elements of classical design like mouldings, sconces & elegant furniture pieces, the spaces are curated as a gallery of art. The Essential exudes grace and timeless beauty and is meant for those who like to live in style.

CLASSICAL

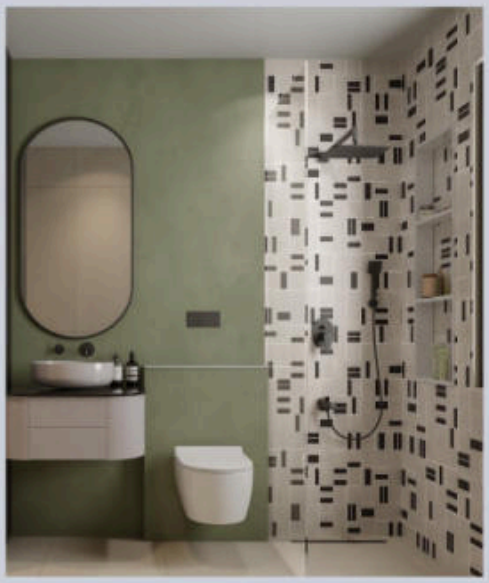

THE ECLECTIC

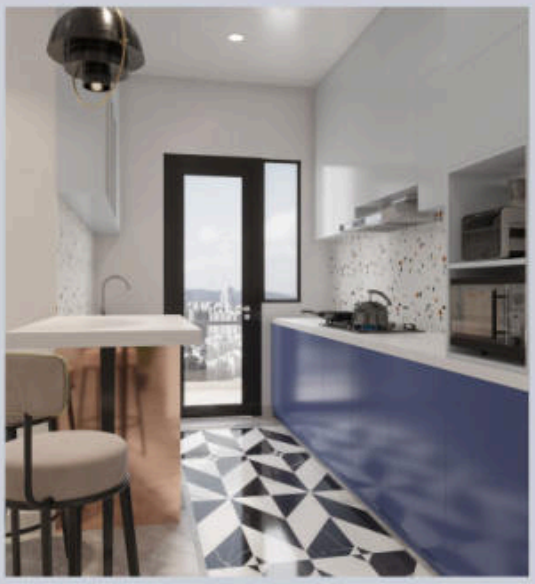

A bolder take on classical design, The Eclectic is an amalgamation of the past with the present and is best experienced with all your senses. A dominantly visual design style, it offers a wide range of varieties in colours, textures, patterns, fabrics, and furnishings. The Eclectic revolves around combining the subtlety of mouldings on walls & ceilings with a pop of retro colours introduced through artworks & fabrics, bringing a literal play of different design styles under one roof.

True to its definition of being quirky, classy, and new – each space is curated to give you a unique experience of the theme. So, if you want your house to make a statement, The Eclectic will never fail you.

CONTEMPORARY

THE RETRO

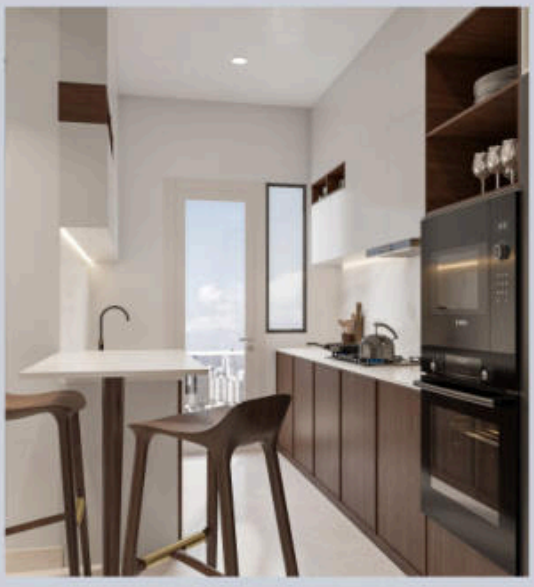

A twist on the contemporary design, this is The Retro. Tinged with the memories of the past, it features elements of the 70s through to the early 90s married to a very modern design language. Creating a rather playful ambience, this theme is one to surely make you nostalgic.

A palette of greys, whites & blues ensures the space has a vibrance to it – one that is further accentuated with details highlighted in black. The furniture and accessories feature clean lines & sleek forms, blending retro-inspired designs with contemporary materials and finishes.

CONTEMPORARY

THE ZEN

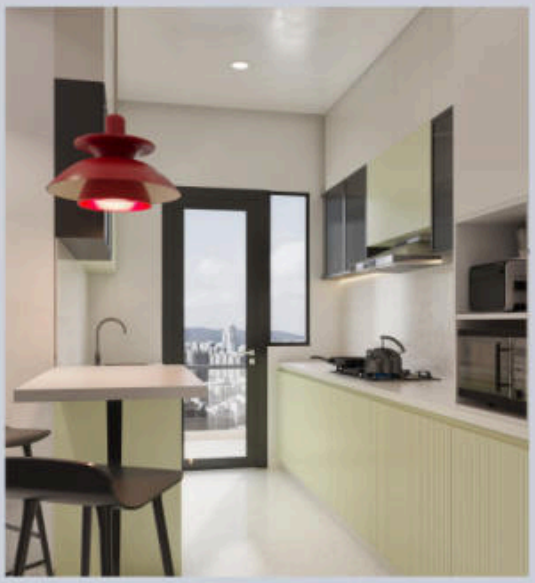

As the name suggests, The Zen is an interpretation of the Japanese interior style, moulded together in a contemporary space. Emphasising on simplicity, neutrality, tranquillity and balance, The Zen is focused on functionality and space optimisation. Overall a minimal aesthetic, this theme encapsulates elements of nature that can exist in your home.

Elements such as natural light, large windows, functional furniture pieces, and minimal interventions on surfaces create an open and fluid living environment. The Zen is the epitome of peace and serenity and makes your experience of being at home almost meditative.

FUTURISTIC

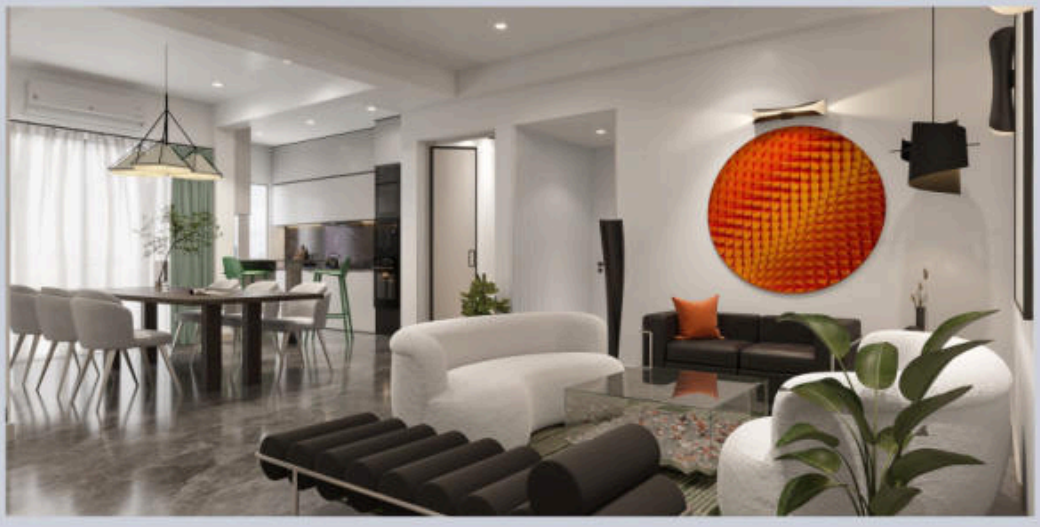

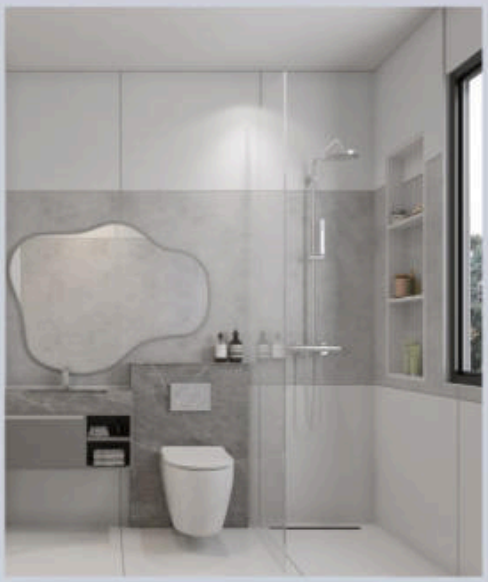

THE SURREAL

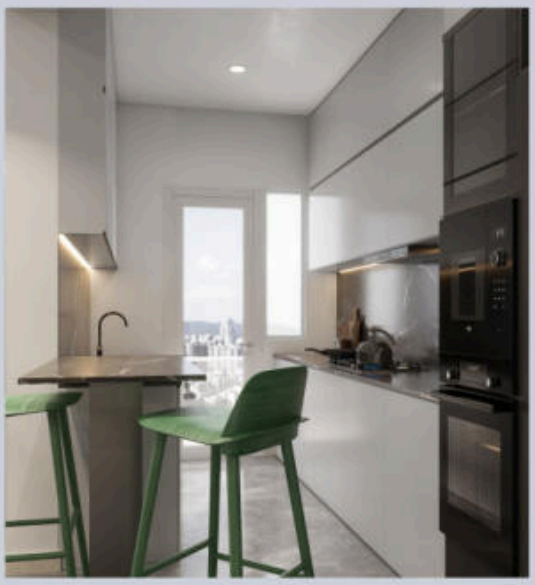

With an avant-garde design style, The Surreal is an unexpected and dreamlike experience. While it intends to transport you into the future with its unconventional shapes and whimsical details, our interpretation of this style simultaneously brings back elements of the past. With a very obvious play of colours and shapes, we imagine your house to be a place of wonder and surprise.

The Surreal challenges the traditional notions of reality through the forms that the furniture takes and how it ties together with the hypnotizing artworks displayed across the entire space. For those who appreciate quirk and whimsy, this theme provides the perfect platform to allow your imagination to create magic.

FUTURISTIC

THE CYBERSCAPE

Set in somewhere beyond 2030, The Cyberscape is a new theme to explore. A minimal take on futuristic design, this theme ensures a sophisticatedly modern space created for its residents. Our interpretation of this theme is a subjective depiction of what the future may look and feel like.

With clean but angular lines of focus, we have used the element of 'light' as the main feature. With plain white surfaces, light grey floors, and subtle colour palettes on furniture, The Cyberscape transports you to the future.
